

## Internal Medicine

The Department of Internal Medicine headed by Professor Dr. med. Curt Diehm provides comprehensive diagnostic and treatment facilities for the following complaints:

- Cardiovascular diseases
- Acute and chronic vascular diseases in arteries, veins, and lymph channels
- Hematologic-oncologic diseases
- Internal diseases requiring intensive care
- Chronic wounds

Patients with circulatory disturbances of the pelvic and leg arteries benefit especially from our internal vascular physicians with the most advanced examination and treatment measures.

## Vascular Centre

We offer patients suffering from vascular diseases unique all-round care in our interdisciplinary Vascular Centre.

We diagnose and treat:

- Circulatory disturbances of the arteries and veins
- Vasocostrictions or obstructions of
  - the pelvic-leg vessels
  - the cervical arteries
  - the arteries of the kidney
- Aortic aneurysms
- Venous thromboses
- Varicose veins
- Diseases of the lymphatic system
- Dialysis shunt treatments
- Inflammatory vascular diseases
- „Arteriosclerosis Screenings“

Specialists in medicament-supported treatment work together with experts in radiological intervention or in vascular surgery treatment.

## Joint Surgery

In our Department of Orthopaedics we specialise not only in treating general orthopaedic diseases, but also in the sub-disciplines of intraluminal tubes and joint surgery.

We offer:

- Joint replacements of the hip joint, knee joint, shoulder joint
- Minimally invasive measures for arthroses
- Treatment of diseases and injuries of the shoulder and knee joints
- Treatment of malformations and diseases of the foot

For arthroscopic minimally invasive operations and intraluminal tube placements we use new technologies such as computer-supported navigation.

## Neurology

Our Department of Neurology headed by Professor Dr. med. Michael Fetter specialises in acute neurology and early rehabilitation. We diagnose and treat patients suffering from:

- Functional disturbances of the brain and the peripheral nervous system
- Neurovascular diseases and strokes (stroke therapy)
- Dizziness and gait disturbances
- Diseases of the spinal cord and spinal column
- Neurotraumatology diseases
- Multiple sclerosis
- Parkinson's disease

Our specialist therapists offer rehabilitation with intensive functional treatments, walking training, massages etc.

## Spinal Surgery

Our Spinal Centre headed by Professor Dr. med. Jürgen Harms is internationally renowned. We specialise in surgical treatment of all illnesses and injuries of the spinal column, applying a broad spectrum of advanced surgical measures:

- Intervertebral disk operations
- Function-preserving replacement of intervertebral disks
- Corrective surgery
- Fusion operations
- Replacement of vertebral bodies
- Cervical spine surgery
- Transoral surgery at the cranio-cervical transition
- Treatment of tumours and fractures
- Treatment of deformities of the spine, especially in infancy
